

Why would I need a Water Refiner?

Hard water contains an excess of minerals such as calcium, magnesium and iron. This causes a wide variety of problems such as lime scale deposits, reduction of appliance efficiency and life span, reduced effectiveness of soaps and detergents, plus the unsightly appearance on surfaces.

An EcoWater Water Refining System® not only resolves these issues by removing the excess calcium and magnesium from the water, it also filters the water throughout your home, removing chlorine taste and odor without compromising water flow, and eliminates the need for additional filters and filter changes.

- **Health and beauty.** Your hair and skin maintain their natural smoothness, moisture and brilliance. Especially beneficial for sensitive skin.
- **Gentler on your clothes and linens.** Hard water makes your laundry harsh and rough. Preserve the brilliance of your colored fabrics and enjoy your brighter and softer whites for much longer.
- **Tastier coffee and tea.** More flavors develop with filtered water.
- **Easier cleaning.** Eliminates hard water spotting on your glassware, cutlery, and dishes, as well as kitchen and bathroom surfaces.
- **Less energy consumption.** Reduces scale deposits on the heating elements of your boiler, dishwasher, washing machine and coffee maker, etc. – aiding in retaining the optimal efficiency of your appliances.
- **Plumbing protection.** Scale clogs pipes, shower heads and faucets, reducing water flow and causing pressure drop.
- **Less consumption of detergents.** Up to 50%* less detergents, soaps and shampoos for the same result! Kinder on the environment too!

*According to the Battelle Report 2011

Why EcoWater Systems?

- We've been providing families with high-quality US manufactured water treatment systems since 1925.
- We're one of the largest manufacturers of residential water treatment systems in the world represented by an international network of professional water treatment dealers.
- We offer an extensive consumer protection package including:
 - Advantage warranty
 - Crest of Excellence, providing provisions for system replacement within one year if product has a repetitive uncorrected problem
 - Perfect 10, an optional extension of the electronics warranty
- We've earned the following agency seals/certifications:
 - Water Quality Association Gold Seal
 - Canadian Standards Association
 - FCC Standards IC3590A-7695 compliant remote
 - NSF International against NSF/ANSI Standard 44 for the reduction of Barium and Radium 226/228, hardness reduction and efficiency, and NSF/ANSI 372 for low lead content

Trust one of the World's Largest Manufacturers

The EcoWater ERR3700/3702 and Boost refiners offer you the best choice of systems that are fully suited to your situation – not just “one size fits all.”

One of the Largest Manufacturers

EcoWater Systems is a world market leader for residential water treatment systems, also offering solutions for commercial and industrial applications. EcoWater has been offering innovative technologies, quality products and superior service for over 90 years.

EcoWater Systems is a member company of *The Marmon Group*, a financially sound subsidiary of *Berkshire Hathaway*.

Smart Water Technology

With EcoWater's unique smart water refiner technology you will have one of the most economic solutions available in the market, both in terms of salt efficiency as well as the water consumption: *up to 60% less running costs per year* compared to a traditional softener system! Your investment will pay for itself in no time, while you enjoy the comfort of softer, cleaner water every day.

Patented and Durable Technologies

EcoWater refiners use a *minimum of moving parts* and almost exclusively *corrosion free materials* to avoid wear and tear.

For example, the patented Teflon™ coated valves and regeneration process with counter-flow brining provide you maximum *efficiency and reliability*.

The Very Best Practice

We focus on *long-term customer relationships*, managing everything from a tailored solution to your specific needs up to *professional installation and maintenance services*.

Enjoy the Best of our Technology!

Well-designed Range of Refiners

Designed to fit into your allotted space and meet your required capacity and flow rate, ERR3700/3702 and Boost models are equipped with upgraded valves to limit pressure drop and improve flow rates. On top of that, the look and feel of the high quality materials and design will make you proud to have an EcoWater system in your home.

Wi-Fi for your Convenience and Peace of Mind!

The optional Wi-Fi function allows you to connect your refiner to your Wi-Fi network** for convenient monitoring and management with your PC, tablet or smartphone from virtually anywhere via the EcoWater HydroLink Plus® web platform:

Secured Dashboard

A simple and secure online dashboard provides system information at a glance, such as: Number of days until the salt tank is empty, Cycle schedule, Water usage, Gallons of available water that can be treated and Amount of scale removed. You can launch a regeneration and adjust your settings from anywhere!

Remote Access for Technical Support

With HydroLink Plus®, you have the option to grant remote access of your system to your EcoWater dealer. This allows them to run an initial diagnosis and order any necessary parts without you having to be at home for a service call, saving time and money. Your dealer can help set up the system according to your specifications, including service reminders, holiday settings, etc.

Customized Alert Messages

Your refiner can warn you via text messages or e-mail when the salt level is low or if potential issues are detected, such as continuous water flow above normal usage threshold.

No Subscription Fee

There are no additional subscription fees for the usage of EcoWater's Wi-Fi HydroLink Plus®.

Remote Management

Allows you to remotely launch a regeneration, adjust your alert settings and more.

**Connectivity depending on compatibility of your private Wi-Fi network. No connection possible through public Wi-Fi networks. ERR3700/3702 and Boost refiners work without a Wi-Fi connection, without any loss of performance.
